

REVERSE ALARM

Specs

- Voltage: DC 12-24V or DC 12-80V
- It meets IP67 protection standards.
- Operation in extreme temperatures from -30°C to +60°C
- Approval: CE, ECE R10
- With Silent Function

Cabling

- Black cable: Negative
 - Red wire: Positive (Factory default beep sound)
 - Yellow cable: Connect to the black cable for 3-5 seconds to switch to broadband sound
 - White cable:
- (1) Keep the black cable connected, after a few seconds, it will be a silent function (0dB).
Disconnect the black cable, it will return to the previous sound.
 - (2) Quickly apply to the black cable twice, it will be a silent function (0db).
Apply black wire for 0-1 seconds, back to the previous sound.
(When power is reapplied, the previous sound will resume)

CAUTION

Do not approach the alarms while they are operating; this may cause momentary deafness and/or ear damage.
